

Course Title: Introduction to Oilfield Life Cycle

Course Duration: 3 days

Who Should Attend: Petroleum Engineers, Geologist and Engineers.

Course Content:

- Introduction to Oil & Gas Industry
- Exploration Phase
 - Geosciences Overview
 - Geophysical Methods
 - Drilling Overview and challenges
- Appraisal Phase
 - Reservoir Engineering
 - Characterization
 - Estimation of Reserves
 - Field Development Planning
- Development Phase
- Production Technology
 - Conventional Completions
 - Specific Completions
 - Secondary & Tertiary Recoveries
 - Challenges
