

Course Title: Well Testing

Course Duration: 7 days

Who Should Attend: Geologists and Petroleum and Reservoir Engineers.

Course Content:

- Introduction to Well testing
- Radial flow
- Log-log type curve analysis
- Pressure transient testing
- Flow regimes
- log-log diagnostic plots
- Bounded reservoir behavior
- Well test interpretation
- Estimation of average drainage area pressure
- Hydraulically fractured wells
- Horizontal wells

- Practical Training (Software)
Participants shall practice learnt concepts on industry-standard software
